

Problem 4: OT

An employee is a medical secretary. He earns \$2,575 monthly for a 35-hour week. For overtime work, he receives extra pay at the regular hourly rate up to 40 hours and time and one-half beyond 40 hours in any week. During one semimonthly pay period, he worked 10 hours overtime. Only 2 hours of this overtime were beyond 40 hours in any one week.

Compute:

a) The regular semimonthly earnings: _____

b) The overtime earnings: _____

c) The total earnings: _____
